2-factor authorization for LIB Dokuwiki

There are 2 methods of 2-factor authentication: Google Authenticator or email. The former is already known from Sage, here a token from a second device is used, the latter sends an e-mail to the stored address with the token.

The decision as to which method is used is clear, but can be reset by an admin.

Attention! Every time your own IP address changes, authentication must be repeated (e.g. when

switching from a desktop computer to a laptop)

The individual steps:

Before anything else: Log out of Dokuwiki.

- Log in with your user name and password and click on "Login".
- Now the selection appears, which method you want to use in the future for 2 factor authorization

1st method - Google Authenticator:

	etestuser (test)
Dok	uWiki - homepage link DokuWiki
	Impressum Data Policy
ŀ	A » en : twofactor_profile
	Two Factor Sottings
	Two-Factor Settings
	This is where you can configure what you want to use as a second factor besides your usual credentials when logging into DokuWiki. What options are available depends on what your administrator has configured.
	This wiki requires the use of two-factor authentication. You always need to have at least one of the mechanisms available below configured before you can use the wiki.
	Add Two-Factor Mechanism
	Mechanism Google Authenticator (TOTP)
	Setup

wer	ed by 🕤 Lib Biodiversity Datacenter

Have the LinOTP app (or the app used for 2FA authentication in Sage) ready on your cell phone.

1.1 A **QR code** will appear on the next screen. Scan this with the LinOTP app (click on the "+" sign at the bottom right).

3/7

1.2 Enter the first code to pair the devices with each other

1.3 Confirm and enter the **second token** (possibly renew the token on the cell phone if it has expired).

G+ Ab			
Ø			

Done.

At the next login **only step 1.3** needs to be executed.

2nd method - e-mail:

Open your favorite e-mail program and log in to the LIB account.

2.1 Choose the **Email option** in the LIB Dokuwiki and click "Setup":
